THE MISSION

\$MUSK GOLD is the "Gold of the Galaxy", a decentralized, peer-to-peer digital asset or commodity that enables you to easily send and receive tokens anywhere throughout earth, our solar system and beyond. Unlike all other assets on Blockchain that were created solely for use on Earth, \$MUSK Gold is made for the entire Universe.

\$MUSK Gold can fuel the financial ecosystem for the new world that pioneer Elon Musk, other innovators, and visionaries have spent decades preparing us for this convergence. This near future off-world society potentially won't be beholden to existing boundaries on Earth and will be based around the **FIVE PILLARS** essential for humanity to thrive; **Energy, Communication, Transportation, Architecture**, and a **New Economic System**.

\$MUSK Gold will be divisible as Rockets, much like a Bitcoin is divisible by Satoshi's. Together, we can create a better and brighter future for all humanity...both on Earth, and beyond.

WHY IS IT CALLED \$MUSK GOLD?

He might be an alien or he might be human. One fact is concrete; he's one of the greatest entrepreneurial anomalies of the 20th and 21st Century. A self-made man, an enigma, a visionary, a super genius, the world's richest man, and much like Midas of old, everything he touches turns to gold. We all aspire to live like Elon Musk, to pattern his formula of success into our lives. Following Elon's path of naming his car brand after his idol Nikola

Tesla, \$MUSK Gold pays homage to this generation's greatest pioneer. He is a man who beats to his own drum and connects to a frequency with the Universe. His spirit of exploration and technological innovation inspires us all to push the boundaries of what it means to be human. \$MUSK Gold honors this trailblazing spirit while allowing us all to join forces and rocket together past the Moon, all the way to Mars, further into space through innovation and create a more inclusive existence for humanity.

"If something is important enough, even if the odds are against you, you should still do it."

Elon Musk

\$MUSK GOLD: SUPPLY

\$MUSK Gold will have a limited and finite supply of 690,420,000 coins. Choosing a limited supply of coins isn't just a fun marketing ploy for us though, because it gives \$MUSK Gold an advantage in the marketplace. It can keep the digital asset scarce, theoretically ensuring that its value holds steady for years to come. This is why we refer to it as "Gold of the Galaxy", much like Bitcoin refers to itself as "digital gold".

There will never be more than 690,420,000 \$MUSK Gold in existence throughout the Cosmos. \$MUSK Gold with its space-centric rewards and loyalties based roadmap is a commodity and asset to acquire, exchange, and trade within the Blockchain space.

A Limited Supply

690,420,000 \$MUSK Gold
to ever exist in the Universe.

LAUNCHING UPON THE PILLARS OF SOCIETY

As rockets soar into the great unknown expanding human exploration into the Universe, and more Rovers land on Mars successfully bringing our awareness to a greater understanding of our place in the Cosmos. There might be a necessity for an interplanetary way to trade and exchange assets and commodities for progression and development. Every society needs a financial system, which \$MUSK Gold will provide.

The discoveries of a new society from our findings in space will help solve problems on earth and lead us with hope and a desire to expand our reach among the stars. As we venture deeper into space we can learn more about the nature of creation in the heavens above and bring this knowledge toward our future expansion as a society together.

Today, with \$MUSK Gold, we prepare for our journey. Every one of the **FIVE PILLARS** sets the framework and inclusive roadmap for all of humanity as we collectively blast off into the future.

“...we won’t experience 100 years of progress in the 21st century — it will be more like 20,000 years of progress.”

Ray Kurzweil

Eg

ENERGY FOR ALL

We as a collective must venture out of the old systems of petrol oil, coal, and dirty fuel damaging our planet and ozone. We must find better solutions. Nikola Tesla preached about 'free energy'. We believe it is on the horizon. Other effective energy frameworks, such as solar, wind, geothermal, hydrogen in batteries, and the potentiality of cold fusion. Today, there exists amazing innovation companies with an authentic intent to save the planet through energy conservation. We plan to create an ecosystem where you can earn and exchange your \$MUSK Gold with your own home solar grid. As you accumulate \$MUSK Gold, you can swap the ones you earn from the sun to charge your electric vehicles, heat your home, or trade on the open market for other assets and commodities.

Hand-in-hand with other visionaries in tech, who can push advances within this new ecosystem, moving forward the human experience.

A cosmic background image featuring a dark space filled with stars and nebulae. A prominent red square is overlaid on the left side, containing the white text 'Co'.

Co

COMMUNICATION

There is hope for the future of humanity in the stars, via satellite internet constellation networks being constructed by innovators, scientists, programmers in the information and communication sector, providing satellite Internet access across Earth, and potentially the entire solar system. This rapidly evolving technology can ultimately allow for \$MUSK Gold to be traded off-planet, allowing the transfer of value to happen instantly throughout the solar system. Humans thrive and evolve with the transfer of knowledge and communication, which might push us toward a new dawn of discovery and self-actualization. There are other technologies being developed today that most inevitably could change the way we interact with each other or other entities in the galaxy. The connection of the human consciousness is vital to our existence living together in a state of perpetual progress as we evolve toward a brighter future through discourse, empathy, kindness, and unconditional love.

Tr

TRANSPORTATION

\$MUSK Gold represents the explorer in all of us who wish to journey past existing boundaries, whether it be to the Moon, Mars, or the center of the Universe. And together, we can build the civilization we all aspire to live in, or on Earth and beyond. Soon we might have flights that span the globe like never before, in under one hours time with the boom of advances in aviation and rocket propulsion business sectors in the world. Florida to Tokyo once took half a day; in 2024, on a rocket, it would only take 43 minutes. \$MUSK Gold can give everyone the ability to acquire your flight pass, or charge your electric battery, or fuel your vehicle on Mars. There potentially might be no need for fiat in the future.

Ar

ADVANCED ARCHITECTURE

With the colonization of the Moon, Mars, and other habitable planets in our close proximity, there could be a need for a new standard of living. A Utopian perspective with the preponderance of what that truly means. \$MUSK Gold plans to create a transactional exchange between consumer and provider at lightning quick speed. On earth or in off-world cities there will be a need to create underground tunnels to solve problems in population, pollution, and emissions. We see the future like Bucky Fuller, another visionary, as geodesic domes with biomorphic architecture dot the terrain in self-sustaining domiciles on both Earth and on planets in space. There might exist a need for building materials, tech, “vertical gardens”, and other resources to create a better, more equitable world for everyone. A place where children no longer go hungry and a roof will be designated over every single person who makes the long journey into space or remains on Earth. It is part of our mission to take care of each other, one by one.

Mo

A NEW ECONOMIC SYSTEM

Part One: Goods and Services

Oil is currently the most sought after commodity in the world and priced in U.S. dollars. The petrodollar has helped elevate the greenback as the world's dominant currency. This is an antiquated system seen by scholars and onlookers alike and in need of a complete and total overhaul. Blockchain is the future. It's in the 'ether'. This is why \$MUSK Gold will use the algorithms and processes of Ethereum. Like many crypto before with their own individual purposes, \$MUSK Gold embraces the advances and systems of confluence already created by its predecessors in the crypto world. \$MUSK Gold does not desire to re-invent, but instead make more efficient and push beyond existing boundaries. It merely wants to change the perspective of the global market to a galaxial market. Everyone, poor, rich, or indifferent will be welcomed to participate in this new source of comprehensive exchange and new rewards based economic system.

The background of the slide is a deep space image showing a dense field of stars and a prominent nebula with green and blue hues. In the lower-left quadrant, there is a large red square. Inside this red square, the letters 'Mo' are written in a white, bold, sans-serif font. Below the red square is a smaller black square, and at the very bottom is a thin grey horizontal bar.

Mo

A NEW ECONOMIC SYSTEM

Part One: Goods and Services

We are talking about an interstellar UBI (Universal Basic Income) that will be used by futuristic societies into the eons and annals of time as the human experience expands and creates a new reality among undiscovered space and the heavens above. In an earthly sphere, we can have multiple opportunities to spend \$MUSK Gold as assets and commodities including access invariably connected to an exchange like: RocketPlace. The first part of this new economic system might be focused on goods and services similar to Facebook and Amazon Marketplaces, but with an emphasis on equity for all the parties in the community with assets placed on Rocketplace. This can include new and used electric vehicles, art, clothing, music, literature, film, and much more. Our exchange plans to accept \$MUSK Gold, Bitcoin, Ethereum, and other forms of digital peer-to-peer blockchain assets and commodities as continually grow into a stronger and global community.

The background of the slide is a deep space image featuring a dark field of stars and a prominent, colorful nebula in the upper left. A large red square is positioned on the left side, containing the white text 'Mo'.

Mo

A NEW ECONOMIC SYSTEM

Part Two: NFT'S

The future is here with the rise of the NFT's (Non-fungible tokens), a digital asset connected to blockchain with one-of-a-kind creations in games, art, music, clothing, concerts, digital, and other unique collectibles. It plans to be an opportunity for anyone in the world and soon the galaxy to exchange creations among each other. RocketPlace's mission includes developing a space where anyone can buy and sell assets and commodities of an intrinsic and personal value. By using \$MUSK Gold Rockets, we will initiate a new process to trade and exchange NFT's with more facility. The potentiality for this piece of the Rocketplace is endless into the Metaverse. We see the Rocketplace to increase its viability for years, decades, and centuries to come as we travel into the unknown of space, the galaxy, and among the stars.

Mo

A NEW ECONOMIC SYSTEM

A Coin For Us All

We believe this can lead to a UBI (Universal Basic Income) as we look for more inventive and effective processes to help those on planet Earth receive attention to their needs. This can include a portion of proceeds from the sellers and buyers to go to charities to battle homelessness, poverty, education in the United States and abroad. Hopefully, as we use these wonderful markets of exchange, we can solve many problems and issues currently occurring on Earth. The ultimate goal when we do begin to habitat and search space and the planets will be for all humans to have access and opportunity to participate in the wonders at our reach. Through our non-profit, the **Intergalactic Giving Anonymous Foundation** (IGAF), we will help those in need.

ASSET & COMMODITY ECOSYSTEM FOR THE FUTURE ECONOMY

Eg

Co

Tr

Ar

Mo

The **FIVE PILLARS** of the future society is also going to be the backbone to a thriving and essential asset and commodity ecosystem, with \$MUSK Gold at the center of it. By the time we reach the end of phase four, the full picture is in front of us. We are looking toward the future vision of what our species can do and become. Theoretically, anything is possible and can happen.

\$MUSK Gold can be integrated into any current industries with the same core values of creating a better world in mind and developing an ecosystem to make everything happen. Our vision is clear and transparent to share our decentralized, peer-to-peer asset and commodity with everyone and anyone around the world...and soon the galaxy.

ROCKETPLACE: THE FUTURE'S MARKETPLACE

For the first time in history, RocketPlace will be tokenizing assets and commodities that are available throughout the solar system. However, to start, our initial phase may include real and virtual collective cars on the blockchain with an app being currently developed. This can be a fully inclusive marketplace similar to the way Amazon started with books and now sell everything under the sun. RocketPlace can begin with an Independent Market for new and used electric cars with an incentive-based system when

trade or exchange with \$MUSK Gold in any part of the Rocketplace. It is a fully integral system with room to grow and progress, giving all in our community the opportunity to find deals and participate in the free market system of commerce.

We encourage others to join our community and create a safe place where anyone can participate and join with an emphasis to advertise their goods and services.

Another facet of RocketPlace unique to blockchain can be the ability to list and rent electric cars and connect those interested in participating in this service. We are creating a super active and social community and with an emphasis to continue to build these ideas as the Roadmap of the future begins to come into view.

Ways to use \$MUSK:

- Use of a Solar Grid
- Use of a Powerwall
- Use of an Electric Car
- Charge a Car Battery
- Exchange or Swap on the Open Market
- Monthly Satellite Internet Bill
- Acquire a Geodesic Home
- Reserve a Rocket Flight Ticket

EXAMPLE

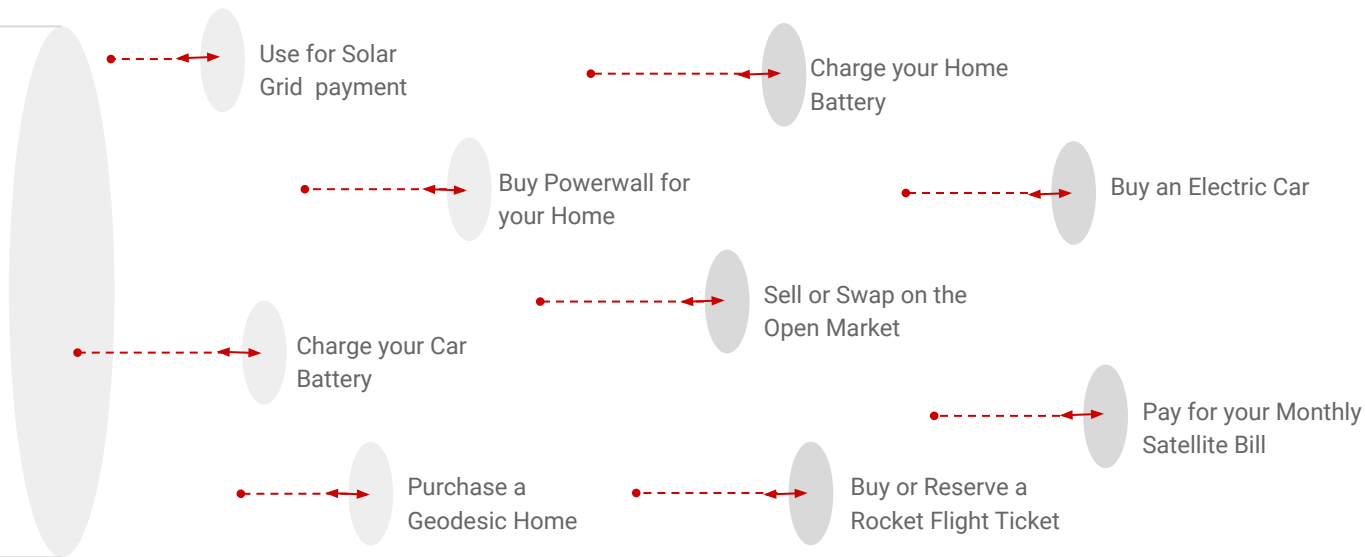

ECOSYSTEM FLOWCHART

Via the RocketPlace, and eventually integrated flawlessly into the technology of the ecosystem suite of products, you can earn \$MUSK Gold, as well as spend the \$MUSK as you earn credits and connect in our inclusive community.

After the purchase and installation of your Solar Grid, each day, you will earn \$MUSK Gold from the sun's energy. If your grid provides a surplus beyond your own energy consumption, you have the ability to spend the extra \$MUSK Gold any way you like, including for yourself or others.

Case Study: Solar Grid

The Grid Earns **\$MUSK**
Reward Credits from the Sun

THE SUN CREATES LIFE

USE CASES IN THE ENERGY PILLAR:

\$MUSK Gold can act as a reward token based on the conserved energy of the consumers connected to the Rocketplace Ecosystem.

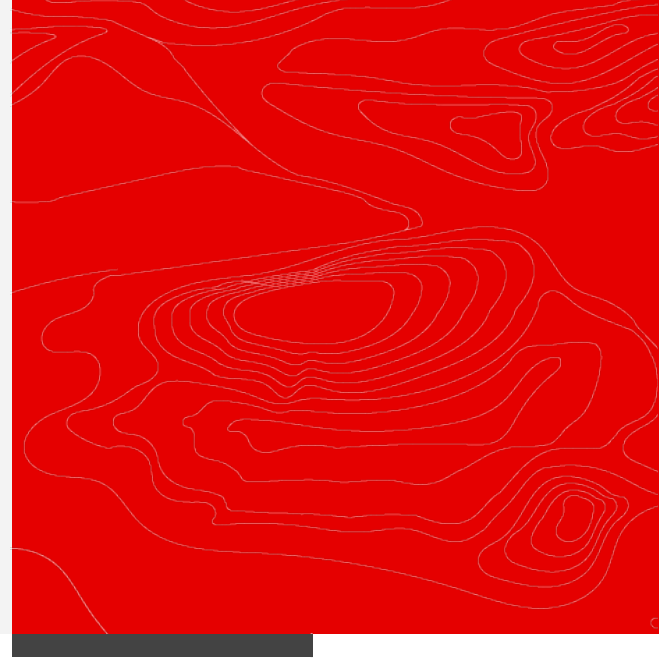

Similar to other rewards programs existing in the current corporate business model, \$MUSK Gold will work off a similar structure. Simply meaning a consumer in the Rocketplace Ecosystem can participate in as many use options in a continual flow. Or participate in one, two, or several. Each use case for the consumer or member of the \$MUSK Gold and Rocketplace community can receive an increased amount of rewards.

True to the spirit of conserving energy, \$MUSK Gold can create a market to exchange, trade, share, and benefit others in the Rocketplace community and their own inner circle of family and friends. \$MUSK Gold wants to harvest partnerships in the energy space with solar panels, solar credits, EV's, housing, and other energy conservation entities who bring added value to the Rocketplace Ecosystem.

ROCKETPLACE: REWARDS

It is the goal of \$MUSK Gold to give everyone the opportunity to be able to participate in the RocketPlace. Similar to the early days of Bitcoin when you were able to fill out a survey and could receive some Bitcoin. We want to empower the blue collar worker, the student, the teacher, the struggling artist, the entrepreneur, and stay-at-home parent to engage in the potentiality to receive \$MUSK Gold Rockets. This can be done using different PR and Sweepstakes strategies on social media. It will be designed into the algorithm of the token to have a percentage of Rockets for giveaways and rewards.

We intend to build a community of like-minded people throughout the world looking for these advances, innovations, and opportunities. It's the goal of the Rocketplace to make the collection or exchange faster, seamless, and with a high level of customer satisfaction. Blockchain and the technologies currently in existence can provide all of this and so much more. We want to be loyal to our Rocketplace community and present in its progress and development in the years and decades to come. Rewards can be another vital element of the Rocketplace structure.

INTERGALACTIC GIVING ANONYMOUS FOUNDATION

"Universal basic income is not a solution in search of a problem - it is the obvious solution that has been in front of us for years. It only requires us to have the vision, empathy and courage to adopt it for people before it is too late."

Andrew Yang

The Intergalactic Giving Anonymous Foundation (IGAF), the associated charity for \$MUSK Gold plans to be an essential piece to the grander vision of \$MUSK Gold and its mission. This can include partnering with fantastic Non-profit Organizations throughout the World like UNICEF to provide resources for poverty, environmental concerns, education, and homelessness.

A portion of \$Musk Gold can be donated to this charity and many like it. In fact, the Rocketplace will donate a sizeable portion from any goods or services exchanged, traded, or collected in the physical market or the NFT Market. \$Musk Gold believes in giving back and creating a future where more equity can exist for everyone as they collect assets and commodities and increase their personal net worth. As we create a brighter reality for the planet and each other it will enable more to rise up and attain more autonomy and sovereignty in their life.

SPACEFLIGHT TO THE FUTURE

The time is now. We have lift off.

This is a **ROADMAP** to the future. A brighter, more inclusive future begins today — one where everyone can join in and become integral as a collective force toward lifting the human consciousness to a higher acknowledgement of the power of uniting with each other to **BE THE CHANGE**.

\$MUSK Gold is the CHANGE. The only change humanity might ever need.

Grab your \$MUSK Gold Rockets and prepare for spaceflight. Buckle Up. And enjoy the ride. 🚀

PHASE 1

THE PAYLOAD

Much like the capsule is the most important piece of the rocket, so is our first phase of the \$MUSK Gold launch as a Public Coin-for-all (ERC-20) on Uniswap. Then it's all systems go with a complete deployment of marketing strategy and outreach to the world. One day there was no \$MUSK Gold. But the next day, it is here, and the world will never be the same. With \$MUSK Gold now out of the ether and into our human reality, there will be a focus on a community acquisition and engagement.

This means to include embracing everyone who wants to have access to \$MUSK Gold, starting with \$MUSK Gold Rocket Giveaways every time a Rocket leaves earth. A welcomed Press Tour can discuss the infinite potential of \$MUSK Gold and the establishment of RocketPlace, with an eye on the future through usage and adoption for \$MUSK Gold as a viable asset and commodity. We want to aspire for acceptance into the digital asset ecosystem — on Earth first, then beyond.

"Everything is light."

Nikola Tesla

PHASE 2

GUIDANCE SYSTEM

There is now full integration into the financial landscape of the World. \$MUSK Gold has become the 'coin of the people'. And now, Wall Street and the financial institutions have taken notice of its potential. It can be possible to use \$MUSK Gold to charge your Electric Car and purchase electricity through your Solar Grid solar panels in your home. Throughout this process, \$MUSK Gold plans to embrace renewable energies and technologies to solve the greatest issues and problems of the planet. Next is where \$MUSK Gold will interface with decentralized finance with connection to mortgages, credit cards, and a bank structure to prepare the planet for what lies ahead in the stars by creating a Blockchain to host \$MUSK Gold and other similar tokens.

While your feet are still on earth, you can also pay your internet bill, or use it to buy other digital goods, like credits in video games, VR of a first-person Mars experience, feature films, music, and more. While we work with other businesses and partnerships to adapt \$MUSK Gold as a new way to fuel the future. Soon you might be able to look above at the once unthinkable of space travel by reserving and paying for your ticket on a Rocket Flight with \$MUSK Gold to explore the cosmos. During this Phase, \$MUSK Gold wants to launch the first ever SATELLITE into space integrated with the Blockchain as the currency travels through space establishing a first for any digital asset creating the potential for a galaxial market.

"Don't shoot for the stars, we already know what's there. Shoot for the space between because ~~that's~~ where the real mystery lies."

PHASE 3

THE FUEL

A mere five years ago, NASA was a shell of its former self. Hence, private contractors with new innovations to revolutionize space travel with the ability to send satellites and give us greater reach through communication here on Earth. Technology is why \$MUSK Gold can revolutionize the digital assets world with an eye toward the impossible and all the potentials in the Universe. \$MUSK Gold wants to propel humanity into a brighter and braver existence, creating future use in the fields of medicine, commerce, science, education, and infrastructure. By working with World Governments,

corporations in technology sectors such as paying for rocket fuel with \$MUSK Gold. This opens the door toward online payments through satellite signals to shoot across the galaxy as civilian space travel becomes a reality. There can be a need that \$MUSK Gold might fill as an asset in digital wallets throughout the galaxy.

The reality of interplanetary space travel into the center of our galaxy is on the precipice of existence. \$MUSK Gold plans to help lead us into this near future.

“The blue distance, the mysterious heavens, the example of birds and insects flying everywhere -- are always beckoning humanity to rise into the air.”

Konstantin Tsiolkovsky

PHASE 4

THE BOOSTER

Come aboard as we voyage to planets, nebulas, asteroids, black holes, and past alien cruisers. The final frontier is infinite. Now is the time for colonization and creating a new world. This potentially can include housing, building of domiciles like geodesic domes sustainable to the climates of the Moon or planets like Mars. Progress can happen faster than we can ever imagine. \$MUSK Gold will position itself to be at the forefront as the human consciousness sees space travel and colonization as a real solution to climate change on Earth and as a real viable reality for human existence throughout the galaxy and beyond.

\$MUSK Gold wants to lead humanity to a point of singularity. A place where there will be no hungry, no sick, no poor, and toward a new dawn of discovery and self-actualization of the purpose of our life. Where anyone can participate in the wonderful journey around the planets and stars and decide how and where they want to live in perpetuity. The potentials for \$MUSK Gold are endless and infinite. In order to see the future, we must first believe now it is reachable. Our vision is for humanity to work together to create a brighter, bigger, lighter, inclusive, and happier future for all on Earth, among the stars, as we travel and habitat the planets in our galaxy.

“The best way to predict the future is to design it.”

R. Buckminster Fuller

TERMS & RISK DISCLOSURE

\$MUSK GOLD ("SMUSK") is a digital representation of value that functions as a medium of exchange, a unit of account, or a store of value, but it does not have legal tender status. SMUSK is a fully launched and developed commodity designed to be used: (1) in digital outer space or other virtual reality platforms and metaverses; (2) alternate reality video games; and (3) non-fungible token marketplaces.

We do not recommend that any user acquire SMUSK. Before acquiring SMUSK, it is essential to understand the significant risks inherent to holding digital assets, including SMUSK. SMUSK is not an investment and should not be traded for profit generating purposes.

SMUSK is a commodity and cannot currently be exchanged for U.S. dollars or other fiat currencies around the world. SMUSK is not currently backed or supported by any government or central bank on Earth or in outer space. SMUSK value is completely derived by market forces of supply and demand, and they are more volatile than traditional assets. The value of SMUSK may be derived from the continued willingness of market participants to exchange other digital assets (or fiat currency) for SMUSK, which may result in the potential for permanent and total loss of value of SMUSK should the market interest for the asset decrease or disappear. The value of SMUSK may also be derived from market participants' willingness and interest in leveraging, partnering with, or incorporating SMUSK. We make no promises or predictions concerning whether such interest exists now or will exist in the future.

Digital assets are not covered by either FDIC or SIPC insurance. Legislative and regulatory changes or actions at the state, federal, or international level may adversely affect the use, transfer, exchange, and value of SMUSK.

Purchasing digital assets, including SMUSK, comes with a number of risks, including volatile market price swings or flash crashes, market manipulation, and cybersecurity risks. In addition, digital asset markets and exchanges are not regulated with the same controls or customer protections available in equity, option, futures, or foreign exchange investing. As such, there is no assurance that a person or platform who today accepts SMUSK as payment or allows for asset-to-asset conversion of SMUSK will continue to do so in the future.

Users should conduct extensive research into SMUSK, before purchasing it or receiving it in exchange for another digital asset. The features, functions, characteristics, operation, use and other properties of this digital asset may be complex, technical, or difficult to understand or evaluate. Although we have taken extensive steps to protect against security risks, SMUSK may be vulnerable to attacks on the security, integrity or operation, including attacks using computing power sufficient to overwhelm the normal operation of the SMUSK's blockchain or other underlying technology.

We do not encourage trading of SMUSK, and users should never obtain SMUSK for the purpose of "investing" in the SMUSK community or with the expectation of profits. If a user chooses to trade or exchange SMUSK in the open market, it is necessary to consider the risks of doing so. Trading SMUSK or any other digital asset can be extremely risky and may not generally be appropriate, particularly with funds drawn from retirement savings, student loans, mortgages, emergency funds, or funds set aside for other purposes. Digital asset trading can lead to large and immediate financial losses. The volatility and unpredictability of the price of a digital asset relative to fiat currency may result in significant loss over a short period of time. Transactions in digital assets may be irreversible, and, accordingly, losses due to fraudulent or accidental transactions may not be recoverable. The nature of digital assets may lead to an increased risk of fraud or cyber-attack.

Under certain market conditions, you may find it difficult or impossible to liquidate a position quickly at a reasonable price. This can occur, for example, when the market for a particular digital asset suddenly drops, or if trading is halted due to recent news events, unusual trading activity, or changes in the underlying digital asset system.

The greater the volatility of a particular digital asset, the greater the likelihood that problems may be encountered in executing a transaction. In addition to normal market risks, you may experience losses due to one or more of the following: system failures, hardware failures, software failures, network connectivity disruptions, and data corruption. Federal agencies have also published advisory documents surrounding the risks of virtual currency. For more information please review: the [CFPB's Consumer Advisory](#), the [CFTC's Customer Advisory](#), the [SEC's Investor Alert](#), and [FINRA's Investor Alert](#).

SMUSK Gold has no connection to Elon Musk or any of his companies and likeness.
